

Welcome to the eSuite HR Portal

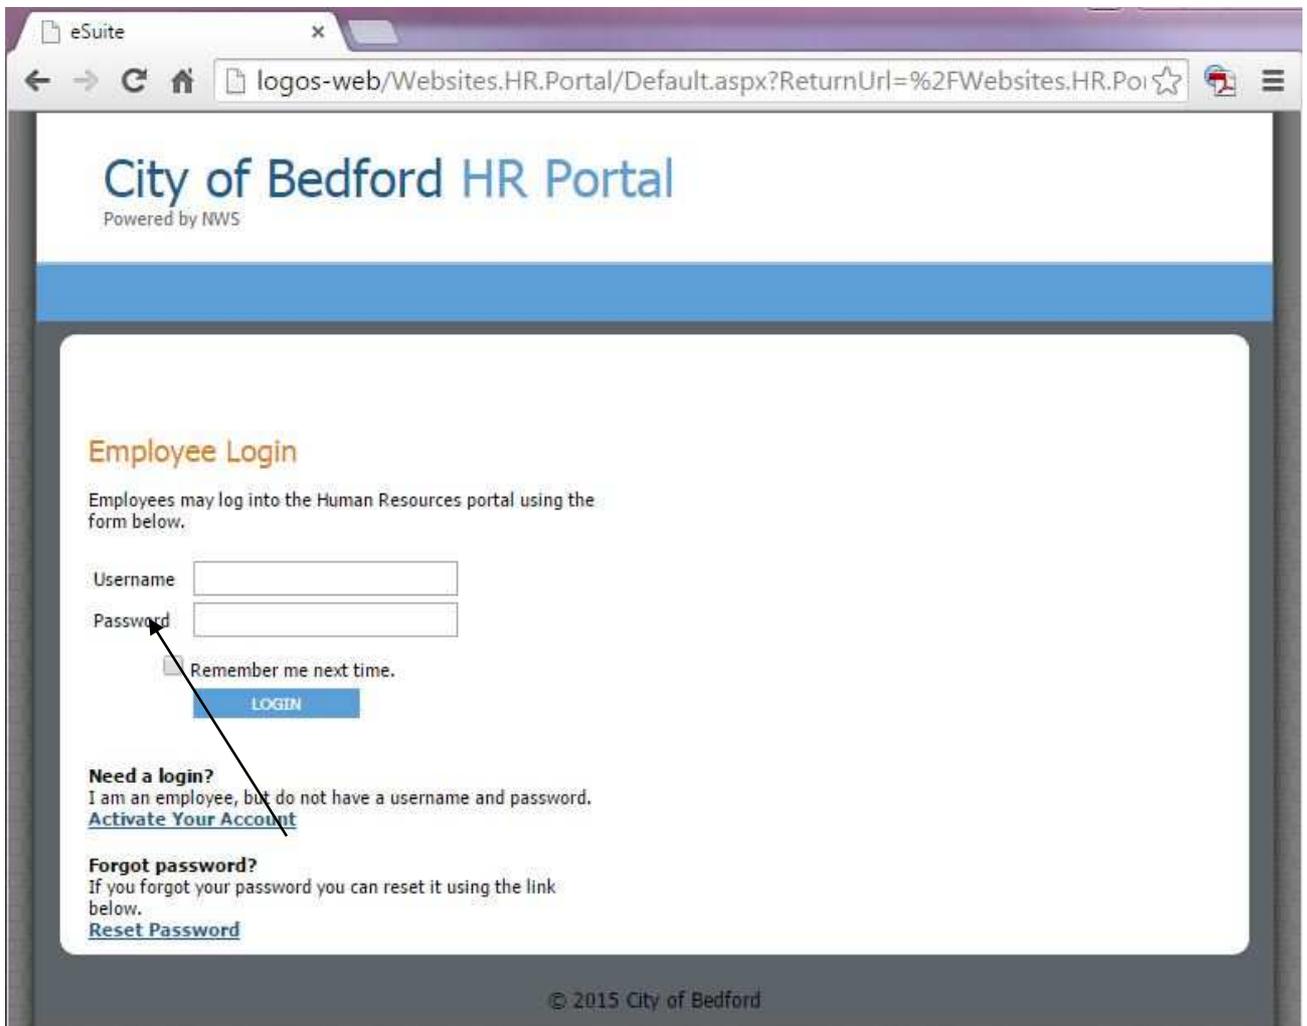

Listed below are the instructions on how to set up the HR portal for your personal use on a daily basis. This portal is designed to provide you access to your important employee information and to make some changes to your information as needed.

A couple of things to keep in mind as you maneuver through this document:

- This is a safe encrypted site. This means that you can rest easy knowing that the information contained in the site is safe and secure so that your information cannot be compromised.
- Your username and password is unique to you. Since you set it up no one else will have access to it. Please write down this information and keep it in a secure location or check the “remember me” option. No one else will have this information so it is important that you keep up with it.
- Some of the pages in the portal are not active (such as timesheets and benefits enrollment). If you click on an inactive page the system will boot you out and you will have to log in again.
- Some of the pages may say that an approval is needed to request a change. Approvals will trigger HR to make changes in multiple locations to ensure all of your records are complete. For example, a change of address requires us to send you a TMRS address change form and to change your address in multiple vendor systems such as CIGNA, ICMA, VSP, etc.
- Lastly, if you experience an error message at any time, please complete a screen shot of the error message and send that to HR so that we are aware of any issues you may have encountered.

We hope that you will find this portal useful. Please feel free to contact HR with any questions or concerns.

Go to myhr.bedfordtx.gov and save this as a favorite for future use.
